

Abstract of the Disclosure

The present invention relates to ALK-7 polypeptides, nucleic acids encoding such polypeptides, cells, tissues and animals containing such nucleic acids, antibodies to such polypeptides, assays
5 utilizing such polypeptides, and methods relating to all of the foregoing. Methods for treatment, diagnosis, and screening are provided for ALK-7 related diseases or conditions characterized by an abnormal
10 interaction between an ALK-7 polypeptide and an ALK-7 binding partner.
